CHILDREN AT WORK BY PLACE OF BIRTH AND PARENT NATIVITY. FOR THE STATE.

[In the column to the left of the figures the designations printed in small capital letters indicate the places of birth of the children at work, while in the subdivided columns immediately thereunder the designations printed in Roman letters indicate, for each place of birth, the parent nativity of these children, the designations in the first column always relating to the nativity of the father and the designations in the second column to the nativity of the mother. The various states and countries shown for parent nativity, and the abbreviations used to denote them, when used, are as follows: — Massachusetts (Mass.); Other New England States (N. E.); Other States (O. S.); Ireland (Ire.); Canada — English (C. E.); Canada — French (C. F.); England (Eng.); Scotland (Scot.); Wales; Nova Scotia (N. S.); Prince Edward Island (P. E. I.); New Brunswick (N. B.); Newfoundland (N. F.); Germany (Ger.); Sweden (Swed.); Portugal (Port.); Portugal — Western Islands (Port (W. I.).); France (Fr.); Italy (It.); Asia; Austria (Aust.); Belgium (Belg.); China; Cuba; Denmark (Den.); Holland (Hol.); Norway (Nor.); Poland (Pol.); Russia (Rus.); South America (S. A.); and Spain (Sp.). In all cases where the place of birth of one or both parents was not stated, the fact is designated by the use of the abbreviation, unk., for unknown.]

CHILDREN AT WORK BY PARENT NATIVITY ONLY. FOR THE STATE.

[For an explanation of the abbreviations used to denote parent nativity, see head-note to preceding table (page 769). In the recapitulation to this table, in which the parent nativity of the children at work is shown in brief form, according as the father or mother is native or foreign born, or their place of birth is unknown, the abbreviations used are as follows: — *n*, for native born; *f*, for foreign born, and *unk*, when the place of birth is unknown.]

CHILDREN AT WORK BY PARENT NATIVITY ONLY. FOR THE STATE.

[For an explanation of the abbreviations used to denote parent nativity, see head-note to preceding table (page 769). In the recapitulation to this table, in which the parent nativity of the children at work is shown in brief form, according as the father or mother is native or foreign born, or their place of birth is unknown, the abbreviations used are as follows: — *n*, for native born; *f*, for foreign born, and *unk*, when the place of birth is unknown.]

SCHOOLS AND SCHOOL PROPERTY.

SCHOOLS AND SCHOOL PROPERTY.

The following presentations, by counties, cities, and towns, concerning schools and school property comprehend both public and private schools, and consist of three parts, the first two of which relate to the number and value of school buildings owned, the number of school buildings or parts of buildings hired (for private schools), and the value of school property, for public and private schools respectively, and the third to a showing of private schools by name, giving in addition to the name, the dates of establishment and incorporation. In the presentation relating to public schools the school buildings are classified, so far as possible, according to the grade or grades taught therein, while in the case of private schools a separate classification is made as to incorporated and unincorporated schools. The presentation of private schools by name is followed, also, by a recapitulation, for the State only, giving the number of private schools established in each of the years specified.

The values returned for school buildings and school property are combustible values, or the amount that might be claimed from an insurance company to replace the buildings, etc., if destroyed by fire. By "school property" is meant maps, globes, pianos, chemical and other scientific apparatus, and such miscellaneous books of reference as do not form a library; that is, the value of all material in the building used for educational purposes. The value of the furniture is included in the value of the buildings.

SCHOOLS AND SCHOOL PROPERTY.

PUBLIC SCHOOLS.

[In towns for which no detail is given, the school buildings are not classified according to the grade or grades taught therein either because they are occupied by mixed schools, that is, schools which contain in one room more than one grade of pupils, or because in some towns it is difficult to so classify them owing to the number of different schools contained in a school building.]

* High school instruction is given to town pupils at Lawrence Academy.

† The high school is taught in the Sandwich Academy, which is in the hands of a board of trustees. The town has the use of the building, apparatus, etc., free of charge.

‡ High school taught in a hired room. The value given under "Buildings" is that of school furniture only.

LIBRARIES AND READING ROOMS.

LIBRARIES AND READING ROOMS.

The presentations relating to libraries and reading rooms are designated as follows:

Libraries:
  Number and Value of Books, and Circulation.
  Amount of Endowment Fund and Income.
  Value and Rental of Buildings Owned and Hired.
  Name, Year in which Opened, Means of Support, and Hours Open Daily and Weekly.
Reading Rooms:
  Value of Reading Room Fixtures, Reading Matter, and Persons using Reading Rooms.
  Number Connected with Libraries (for the State only).
  Name, Year in which Opened, Means of Support, and Hours Open Daily and Weekly.

In the presentations relating to libraries, the following classification of libraries is used:

Secular.
City public,
Town public,
Other public,
Association,
Private circulating,
Public school,
Private school,

Secular — Con.
Public and private school,
College,
Scientific,
Artistic,
Law,
Medical,
Hospital,

Secular — Con.
Reference,
Institution.

Religious.
Church,
Church and Sunday school,
Sunday school,
Association.

By "Other public" is meant libraries that derive their support from private sources, but which are maintained for the use of the public in the same way as city and town libraries. By "Institution" is meant libraries connected with prisons, houses of correction, and other penal or reformatory institutions, and maintained for the use of the inmates thereof. In other respects, the designations are sufficiently explicit without particular explanation. A similar classification is also shown for reading rooms in a recapitulation, for the State, by kind of reading rooms (pages 974 and 975).

The presentation of libraries by name follows the order of classification used in the preceding table for libraries (as explained above), which for convenience of comparison is preferable to a strictly alphabetical arrangement. A similar arrangement of reading rooms by name is also made, following the order of classification used in the recapitulation by kind of reading rooms (just referred to).

Recapitulations giving, for the State only, the number of libraries and reading rooms opened in each specified year follow, respectively, the presentations of libraries and reading rooms by name.

In the presentations showing libraries and reading rooms by name, in the column headed "Hours Open Daily," the following abbreviations are used to denote the days of the week: Sun., for Sunday; Mon., for Monday; Tu., for Tuesday; Wed., for Wednesday; Th., for Thursday; Fri., for Friday, and Sat., for Saturday. In the same column, also, the designation "exc." signifies the abbreviation of the word "except."

The returns relating to the circulation of books (for libraries) and to the number of persons using reading rooms (for reading rooms) are for the Census year ending June 30, 1885, unless otherwise explained in foot-notes.

The number of newspapers and periodicals returned for a reading room does not represent necessarily the number of *different* newspapers and periodicals, but the number of copies, including duplicates, usually kept on file for the use of readers.

Returns were also received from fourteen libraries and three reading rooms which have been established since the close of the Census year (June 30, 1885), and these returns, wherever applicable, are included in this presentation.

The values returned for books, buildings owned, and reading room fixtures are combustible values, or the amount that might be claimed from an insurance company to replace the books, buildings, etc., if destroyed by fire.

Four towns, namely, Washington, in the county of Berkshire, Seekonk, in the county of Bristol, Gosnold, in the county of Dukes, and Millis, in the county of Norfolk, made no return of either libraries or reading rooms.

The information returned for reading rooms concerning the amount of endowment funds and income therefrom, and the value and rental of buildings owned and hired, is not presented in detail by towns, but is considered in the "ANALYSIS."

LIBRARIES AND READING ROOMS.

LIBRARIES: NUMBER AND VALUE OF BOOKS, AND CIRCULATION.

[The figures given under "Circulation" represent the use of books at home only, and for the Census year ending June 30, 1885, unless otherwise specified.]

LIBRARIES AND READING ROOMS.

LIBRARIES: NAME, YEAR IN WHICH OPENED, MEANS OF SUPPORT, AND HOURS OPEN DAILY AND WEEKLY.

[In all cases where there is a reading room connected with a library, the letters "R. R." follow, in parenthesis, the name of the library. The letters, "S. S.," in the names of libraries, denote the abbreviation of the words, "Sunday School." Under the designation, "Hours Open Daily," the word daily means week-days and does not include Sunday.]

LIBRARIES AND READING ROOMS.

READING ROOMS: VALUE OF READING ROOM FIXTURES, READING MATTER, AND PERSONS USING READING ROOMS.

[In this presentation, the reading rooms returned for each city and town are secular reading rooms, unless otherwise specified. The figures in the column designated "Persons using Reading Rooms" represent the number of persons using reading rooms during the Census year ending June 30, 1885. The designation, "No. making return," signifies the number of reading rooms for which a return was made of the information specified.]

LIBRARIES AND READING ROOMS.

READING ROOMS: NAME, YEAR IN WHICH OPENED, MEANS OF SUPPORT, AND HOURS OPEN DAILY AND WEEKLY.

[In this presentation, the reading rooms returned for each city and town are secular reading rooms, unless otherwise designated; in the case of religious reading rooms, the letter "R" follows, in parenthesis, the name of the reading room. Under the designation, "Hours Open Daily," the word daily means week-days, and does not include Sunday.]

Counties, Cities, Towns, and Name of Reading Room.	Year in which Opened	How Supported	Hours Open Daily	Total Hours Weekly
BARNSTABLE.				
Barnstable,				
Osterville Public Library Reading Room,	1882	Contributions and fairs	Daily, 5 hours	30

ILLITERACY.

ILLITERACY.

The presentation of illiteracy in detail by cities and towns is comprised in two tables, these tables being designated as follows:

Total Illiteracy: By Towns.
Degree of Illiteracy, Native and Foreign Born, and Age Periods: By Towns.

The first table presents by sex for each city and town the native born, foreign born, and total population 10 years of age and over, the total number of persons 10 years of age and over who are illiterate, and the percentages of total illiterates of total population 10 years of age and over; the recapitulation for the State and counties (page 1001) gives, also, the number and percentages of illiterates as regards native and foreign born persons 10 years of age and over. The number of native and foreign born illiterates is given by towns in the table showing the degree of illiteracy, etc. (pages 1002–1061), and similar percentages as regards native and foreign born persons 10 years of age and over can be figured for any city or town, as may be desired.

The second table supplies a classification of the illiterates, by counties, cities, and towns, and for the State, according to the degree of illiteracy, that is, first, the number who *cannot read* but can write; second, the number who *cannot write* but can read, and third, the number who *can neither read nor write.* This table also shows a distribution of the illiterates, for each degree of illiteracy, by age periods and sex, with a still further subdivision as to whether they were born in Massachusetts, in other parts of the United States (other native born), or were foreign born. In addition, three percentage tables are given for the State only, showing first, the distribution by percentages of illiterates according to the degree of illiteracy and by age periods; second, the percentages of native and foreign born illiterates of total illiterates, and third, the percentages of illiterates of population 10 years of age and over.

In addition to the two tables showing illiteracy by towns, a very complete showing of illiteracy as regards place of birth, parent nativity, occupations, language, and color and race is presented for the State only, together with a special showing, for the State, of illiterate aliens by age periods and place of birth.

The occupations of illiterate aliens are given in detail (pages 665–738) as a part of the presentation of "OCCUPATIONS BY NAME," while a similar presentation of the occupations of illiterate children at work is given (pages 780–784) as a part of the showing relating to "CHILDREN AT WORK."

The age period classification used in these tables comprehends those persons of legal school age, or from 10 to 13 years of age; young persons from 14 to 19 years of age, and three classes of adult persons, including those between 20 and 29 years of age, 30 and 49 years of age, and those 50 years of age and over. A few persons are also returned for whom the age is unknown.

In the presentations for the State relating to the parent nativity of illiterate persons (pages 1070–1087), the various states and countries shown in detail, and the abbreviations used to denote them, are as follows:— Massachusetts (Mass.); Other New England States (N. E.); Other States (O. S.); Ireland (Ire.); Canada—English (C. E.); Canada—French (C. F.); England (Eng.); Scotland (Scot.); Wales; Nova Scotia (N. S.); New Brunswick (N. B.); Newfoundland (N. F.); Prince Edward Island (P. E. I.); British Possessions, Other (B. P. O.); British America, *n. s.* (B. A., *n. s.*); Germany (Ger.); France (Fr.); Italy (It.); and Other Countries (O. C.). In all cases where the place of birth of one or both parents was not stated, the fact is designated by the use of the abbreviation, Unk., for unknown. In the recapitulations to these presentations, the parent nativity of illiterate persons is also shown in brief form, according as the father or mother is native or foreign born, or their place of birth is unknown, the abbreviations used being as follows:—*n*, for native born; *f*, for foreign born, and *unk*, when the place of birth is unknown.

ILLITERACY.

TOTAL ILLITERACY: BY TOWNS.

["Illiterates" include all persons 10 years of age and over who either cannot read, cannot write, or can neither read nor write. See explanatory text on page 989, relating to the number and percentages of illiterates.]

ILLITERACY BY PLACE OF BIRTH AND PARENT NATIVITY.
FOR THE STATE.

[In this presentation, the results concerning illiteracy by place of birth and parent nativity relate to the illiterates as a whole, without regard to the degree of illiteracy. The designations printed in the two columns to the left of the figures indicate the parent nativity of illiterate persons, the designations in the first column always relating to the nativity of the father and the designations in the second column to the nativity of the mother. For an explanation of the abbreviations used to denote parent nativity, see the explanatory text on page 989.]

ILLITERACY BY PLACE OF BIRTH AND PARENT NATIVITY.
FOR THE STATE.

[In this presentation, the results concerning illiteracy by place of birth and parent nativity relate to the illiterates as a whole, without regard to the degree of illiteracy. The designations printed in the two columns to the left of the figures indicate the parent nativity of illiterate persons, the designations in the first column always relating to the nativity of the father and the designations in the second column to the nativity of the mother. For an explanation of the abbreviations used to denote parent nativity, see the explanatory text on page 989.]

ILLITERACY BY PARENT NATIVITY AND AGE PERIODS.
FOR THE STATE.

[In this presentation, the results concerning illiteracy by parent nativity and age periods relate to the illiterates as a whole, without regard to the degree of illiteracy. The designations printed in the two columns to the left of the figures indicate the parent nativity of illiterate persons, the designations in the first column always relating to the nativity of the father and the designations in the second column to the nativity of the mother. For an explanation of the abbreviations used to denote parent nativity, see the explanatory text on page 989.]

ILLITERACY BY OCCUPATIONS, IN DETAIL. FOR THE STATE.

[This presentation gives the occupations of illiterates, in detail, for the State, and follows mainly the classification used in the presentation of the occupations of the people as a whole (see "OCCUPATIONS IN DETAIL, BY SEX," page 413), except that in certain instances unimportant details have been combined and are presented in a single line. For example, under "RELIGION," for cemetery service, the number of "laborers" who are illiterate is given, while all other illiterate persons engaged in cemetery service are included in the designation, "other cemetery service." In certain other points of minor importance, a similar condensation has been made, to save space, so far as possible, but without detriment to the proper presentation of the occupations of illiterate persons. The italic letters, *n. s.*, denote the abbreviation of the words, "not specified."]

ILLITERACY AS REGARDS LANGUAGE. FOR THE STATE.

PLACE OF BIRTH OF PERSONS 10 YEARS OF AGE AND OVER WHO READ AND WRITE OTHER THAN THE ENGLISH LANGUAGE: BY AGE PERIODS.

[This presentation relates to those persons 10 years of age and over who cannot read and write the English language but who can read and write some language other than English, and who for this reason are not considered as being illiterate.]

MARRIED WOMEN AND MOTHERS:

WITH NUMBER OF

CHILDREN AND CHILDREN LIVING.

MARRIED WOMEN AND MOTHERS:

WITH NUMBER OF

CHILDREN AND CHILDREN LIVING.

The first presentation relating to married women and mothers gives by towns the total number of married women, classified as regards native and foreign born, and subdivided as to the number who have had children and the number who have had no children; for the married women having children, the table also shows the total and average number of children, children living, and children not living. Besides the recapitulation for the State and counties showing numbers and averages, a recapitulation by percentages follows, according as the married women and mothers are native or foreign born.

In addition to the showing by towns, two percentage tables for the State and counties follow, giving the percentages of married women having children or no children, and, for mothers, the percentages of children living or not living. A classification of married women and mothers, by number and percentages, is also made, for the State only, as regards age periods and place of birth.

For married women having children, a very complete and detailed showing, for the State only, is made, classified as regards specified numbers of children and children living, with percentages and averages, and as regards age periods, place of birth, and parent nativity, with total and average number of children and children living, and percentages.

In the presentations showing parent nativity of married women having children, on pages 1190-1207, the various states and countries shown in detail, and the abbreviations used to denote them, are as follows: — Massachusetts (Mass.); Other New England States (N. E.); Other States (O. S.); Ireland (Ire.); Canada — English (C. E.); Canada — French (C. F.); Great Britain (G. B.); British Possessions, not otherwise specified (B. P.); Germany (Ger.); and Other Countries (O. C.). In all cases where the place of birth of one or both parents was not stated, the fact is designated by the use of the abbreviation, Unk., for unknown. In the recapitulation to the second presentation, the parent nativity of married women having children is shown in brief form, according as the father or mother is native or foreign born, or their place of birth is unknown, the abbreviations used being as follows: — *n*, for native born; *f*, for foreign born, and *unk*, when the place of birth is unknown. These abbreviations denoting parent nativity in brief form are also used in the presentations on pages 1210 and 1211.

In the presentation on pages 1208 and 1209, the designations used to denote the parentage of married women having children may be briefly explained. For instance, for those women born in Massachusetts, "Massachusetts parentage" means that both parents were born in Massachusetts; "other native parentage," that both parents were native born, one parent having been born in Massachusetts and the other parent in some other part of the United States, or both parents may have been born somewhere in the United States but not in Massachusetts; "foreign parentage," that both parents are foreign born; "mixed parentage," that one parent was native and the other parent foreign born; "unknown parentage," that the nativity of one or both parents is unknown. In the same way, for those women born in Ireland, a classification as to parentage is made as regards those having both parents born in Ireland (Ireland parentage); those having one parent born in Ireland and the other parent born in some other foreign country, or having both parents born in foreign countries other than Ireland (other foreign parentage); those having parents born somewhere in the United States (native parentage); those having one parent native and the other parent foreign born (mixed parentage), and those for whom the nativity of one or both parents is unknown (unknown parentage). A similar classification is made for each place of birth, following the same plan as explained in the case of those born in Massachusetts or in Ireland, as well as for all the native born women, all the foreign born women, and the aggregate number of women, both native and foreign born, having the specified parentages.

MARRIED WOMEN AND MOTHERS: CHILDREN, ETC. — Continued.

PLACE OF BIRTH AND PARENT NATIVITY OF MARRIED WOMEN HAVING CHILDREN: BY AGE PERIODS. FOR THE STATE.

[In the column to the left of the figures the designations printed in small capital letters indicate the places of birth of the married women having children. In the subdivided columns immediately thereunder the designations printed in Roman letters indicate, for each place of birth, the parent nativity of these women, the designations in the first column always relating to the nativity of the father and the designations in the second column to the nativity of the mother. For an explanation of the abbreviations used to denote parent nativity, see page 1147, *ante.*]

MARRIED WOMEN AND MOTHERS: CHILDREN, ETC. — Continued.

NUMBER OF MOTHERS, WITH TOTAL NUMBER, AVERAGE NUMBER, AND PERCENTAGES OF CHILDREN LIVING AND CHILDREN NOT LIVING, BY PLACE OF BIRTH AND PARENTAGE OF MOTHERS.

FOR THE STATE.

[In the column to the left of the figures the designations printed in small capital letters indicate the places of birth of the married women having children, the parentage of these women, for each place of birth, being shown immediately thereunder. For an explanation of the designations of parentage, see page 1147, *ante*.]

PRISONERS AND CONVICTS.

PRISONERS AND CONVICTS.

The information concerning prisoners and convicts is presented in two parts, the first part relating wholly to prisoners and the second to convicts.

Prisoners include those persons who are awaiting trial for an alleged offence, who are held as witnesses, or who are serving out fines.

Convicts include those persons who have been tried, convicted, and sentenced to imprisonment for a specified term or to suffer the death penalty.

In the presentations by towns for prisoners and convicts, respectively, the total number of persons considered are classified according to the number who are able-bodied and the number who are defective, that is, have some defective physical condition, the defective persons being also considered in detail under "PHYSICAL CONDITION." The prisoners and convicts are also classified as to residence, giving the number who claim a residence in the town in which the institution where confined is located (town named) and the number whose residence when at home is in other towns, in other States, or in foreign countries (other towns, etc.). Under "Conjugal Condition," the designation "married, etc." includes those persons whose conjugal condition is either married, widowed, or divorced.

For both prisoners and convicts, the town presentations are followed by showings, for the State only, concerning ages, place of birth, and parent nativity.

In the presentations of parent nativity, the various States and countries shown in detail, and the abbreviations used to denote them, are as follows: — Massachusetts (Mass.); Other New England States (N. E.); Other States (O. S.); Ireland (Ire.); Canada — English (C. E.); Canada — French (C. F.); England (Eng.); Scotland (Scot.); Wales; Nova Scotia (N. S.); New Brunswick (N. B.); Newfoundland (N. F.); Prince Edward Island (P. E. I.); British Possessions, Other (B. P. O.); Germany (Ger.); France (Fr.); Italy (It.); Africa; Belgium (Belg.); China; Denmark (Den.); Holland (Hol.); Japan; Mexico; Norway (Nor.); Poland (Pol.); Portugal (Port.); Russia (Rus.); South America (S. A.); Spain (Sp.); Sweden (Swed.); Switzerland (Switz.); and West Indies (W. I.). In all cases where the place of birth of one or both parents was not stated, the fact is designated by the use of the abbreviation, Unk., for unknown. In the recapitulations to these presentations, the parent nativity is also shown in brief form, according as the father or mother is native or foreign born, or their place of birth is unknown, the abbreviations used being as follows: — *n*, for native born; *f*, for foreign born, and *unk*, when the place of birth is unknown.

HOMELESS CHILDREN AND PAUPERS.

HOMELESS CHILDREN AND PAUPERS.

The information concerning homeless children and paupers is presented in two parts, the first part relating wholly to homeless children and the second to paupers.

Homeless children include those persons under twenty-one years of age who were returned in the Census, first, as being partially or wholly supported in public institutions by public charity; second, as being supported in private families (sometimes living with parents or relatives) either wholly or partially by public or private charity, by parents, relatives, or are self-supporting, and third, as being provided with a home in private institutions either at the expense of their parents or relatives or by private charity. A classification of homeless children by residence and means of support is given on page 1248, showing the number returned as being in city and town almshouses; in city institutions, including city hospitals, and industrial, farm, and reform schools; in state institutions, including schools and hospitals for the afflicted, and primary, industrial, and reform schools; in private families, and in private institutions, including homes and asylums for orphans and destitute children maintained by private beneficence.

Paupers include those persons twenty-one years of age and over who are partially or wholly supported by public charity, and are found both in public institutions and in private families.

In the presentations by towns for homeless children and paupers, respectively, the total number of persons considered are classified according to the number who are able-bodied and the number who are defective, that is, have some defective physical condition, the defective persons being also considered in detail under "PHYSICAL CONDITION." The homeless children and paupers are also classified as to residence, giving the number who claim a residence in the town in which returned (town named) and the number whose residence when at home is in other towns, in other States, or in foreign countries (other towns, etc.). Under "Conjugal Condition," the designation "married, etc." includes those persons whose conjugal condition is either married, widowed, or divorced.

For both homeless children and paupers, the town presentations are followed by showings, for the State only, concerning ages, place of birth, parent nativity, and means of support.

In the presentations showing parent nativity, the various states and countries shown in detail, and the abbreviations used to denote them, are as follows: — Massachusetts (Mass.); Other New England States (N. E.); Other States (O. S.); Ireland (Ire.); Canada — English (C. E.); Canada — French (C. F.); England (Eng.); Scotland (Scot.); Wales; Nova Scotia (N. S.); New Brunswick (N. B.); Newfoundland (N. F.); Prince Edward Island (P. E. I.); British Possessions, Other (B. P. O.); Germany (Ger.); France (Fr.); Italy (It.); Africa; Asia; Austria (Aust.); Belgium (Belg.); Denmark (Den.); Holland (Hol.); Norway (Nor.); Poland (Pol.); Portugal (Port.); Russia (Rus.); Sandwich Islands (S. I.); South America (S. A.); Spain (Sp.); Sweden (Swed.); Switzerland (Switz.); Turkey (Tur.); West Indies (W. I.); and Other Foreign Countries (O. F. C.). In all cases where the place of birth of one or both parents was not stated, the fact is designated by the use of the abbreviation, Unk., for unknown. In the recapitulations to these presentations, the parent nativity is also shown in brief form, according as the father or mother is native or foreign born, or their place of birth is unknown, the abbreviations used being as follows: — *n*, for native born; *f*, for foreign born, and *unk*, when the place of birth is unknown.

PHYSICAL CONDITION.

PHYSICAL CONDITION.

The persons comprehended under this designation include those who were returned as having some defective physical condition, or, in other words, those persons suffering from acute or chronic diseases, or who are blind, deaf, dumb, deaf and dumb, insane, idiotic, maimed, lame, bedridden, paralytic, or deformed. The information concerning these persons is contained in four presentations.

The first of these presentations gives by cities and towns the *number of persons* having defective physical conditions, the persons being classified according as they are prisoners, convicts, homeless children, paupers, or, for convenience of designation, "other persons," meaning persons other than any of the four classes just named. This classification of persons is used only for those cities and towns in which there are either prisoners, convicts, homeless children, or paupers, as well as "other persons," having defective physical conditions; in those towns for which no classification of persons appears, the persons returned as having defective physical conditions are all "other persons." For instance, on page 1273, there are 82 persons returned for the town of Barnstable, of which one is a homeless child, 10 are paupers, and 71 are simply "other persons." In the town of Bourne, also, there are 16 persons so returned, but of which none belong to any of the four classes named; that is, they are all "other persons," and for this reason no classification of persons is needed.

In the consideration of the results shown in these presentations, it must be borne in mind that the number of prisoners, convicts, homeless children, and paupers comprehended by these showings is the number only of those having defective physical conditions, the whole number for each of these classes respectively being given under the headings, "PRISONERS AND CONVICTS" and "HOMELESS CHILDREN AND PAUPERS."

The classification of defective physical conditions, in detail, beginning on page 1282 is based upon the following order of defective physical conditions, either as representing single conditions or combinations of two or more conditions:

Acute Diseases,
Chronic Diseases,
Blind,
Deaf,
Dumb,
Deaf and Dumb,
Insane,
Idiotic,
Maimed,
Lame,
Bedridden,
Paralytic,
Deformed.

As an illustration, it will be seen by reference to the table that under "HOMELESS CHILDREN" there are 55 persons returned for "Chronic diseases," this being a single condition, and one person for "Chronic diseases and insane," this being a combination of two conditions, that is, this person was returned both as having a chronic disease and as being insane. The other combinations are to be read in a similar way. In this presentation the designations denoting defective physical conditions appear but once in the order of the classification forward, the object of this showing being to give the true total of persons having defective physical conditions in detail by each respective condition.

The second presentation gives by cities and towns the number of persons for each defective physical condition without regard to the results for other conditions. That is to say, under "Acute Diseases" is presented the number of persons suffering from acute diseases, without regard to whether any or all of these persons are also blind, insane, lame, or have other defective physical conditions. The totals given under each heading for "Acute Diseases," "Chronic Diseases," "Blind," etc., etc., may be said to be, therefore, "condition totals" as distinguished from the *true number of persons* shown in the first presentation, as just explained. In this second presentation, for instance, a person having a chronic disease and being also blind appears twice, once under the heading of "Chronic Diseases" and again under the heading of "Blind," although in reality there is but one person so far as *number* is concerned. In this way, duplications are made successively for all those persons who were returned as having more than a single defective physical condition. The large number of persons returned in certain towns under some of the headings for defective physical conditions is due to the presence in those towns of large institutions.

In the third presentation, for the State only, the persons considered for each condition, as "Acute Diseases," etc., are classified according to the number returned as being in institutions or in private families; the number who claim a residence in the town in which returned or whose residence when at home is in other towns, in other States, or in foreign countries (other towns, etc.); the number who are native or foreign born; the number who are single or "married, etc.," that is, either married, widowed, or divorced; the number who are illiterate, and whether native or foreign born; and finally as to the means of support.

The fourth presentation, for the State only, comprehends a detailed classification of conditions, in accordance with the classification used in the showing beginning on page 1282; the results presented in the first and fourth showings only are *true totals for persons* as opposed to "condition totals" as used in the second and third showings. The information concerning native and foreign born, conjugal condition, etc., given in this presentation as regards the number of persons returned for each defective physical condition in detail, is the same as comprehended by the third presentation, with a recapitulation by classes of persons and by sex.

PHYSICAL CONDITION.

NUMBER OF PERSONS HAVING DEFECTIVE PHYSICAL CONDITIONS: BY TOWNS.

[In those towns for which no classification of persons appears, the persons returned as having defective physical conditions are neither prisoners, convicts, homeless children, nor paupers, that is, are all "other persons." For a more complete description of this table, see the explanatory text on page 1271.]
